

# How to be COVID Secure:

## Guidance for those running outdoor working environments

The vast majority of employers are responsible and will join with the UK's fight against COVID-19 by working with the government and their sector bodies to protect their workers and the public. However, inspectors are carrying out compliance checks nationwide to ensure that employers are taking the necessary steps.

### SECTION 1 What To Be Aware Of

Steps to protect yourself, your staff and your customers during coronavirus:

#### **Make sure everyone is social**

**distancing:** Make it easy for everyone to do so by putting up signs or introducing a one-way system that your staff and visitors can follow

#### **Reduce crowding:**

Consider how many people can be in each space while remaining socially distanced and how to prevent crowding in busy areas. Consider separating the site into smaller zones to keep groups separate

#### **Arrange workspaces to keep**

**staff apart:** Consider using barriers to separate staff, introduce back-to-back or side-to-side working, and spread out workstations

#### **Communicate and train:**

Make sure all workers, contractors and visitors are kept up to date with how safety measures are being used and updated

## SECTION 2

### Managing Risk

The objective is always to reduce risk to the lowest reasonably practicable level by taking preventative measures.

Employers must share the results of your risk assessment with their workforce. If possible, employers should consider publishing the results on their website (and it is mandatory of businesses with over 50 workers). All businesses should demonstrate to their workers and customers that they have properly assessed their risk and taken appropriate measures to mitigate this.

In every workplace, increasing the frequency of handwashing and surface cleaning

When in the workplace, everyone should make every reasonable effort to comply with the social distancing guidelines set out by the government (2m, or 1m with risk mitigation where 2m is not viable)

Where the social distancing guidelines cannot be followed in full, in relation to a particular activity, businesses should consider whether that activity can be redesigned to maintain a 2m distance or 1m with risk mitigations – such as using screens or barriers to separate people from each other

## Ensure your site remains safe during the COVID-19 pandemic and beyond with ZNDUK

Tested to the highest standard, our Sanitisation Station, Social Distancing Covers and Social Distancing Queuing System are the perfect companions for any construction site, retail or event setting to keep your staff and the public safe.
