Meeting the toughest demands

Innovative solutions from Europe's largest manufacturer of **temporary fencing** and **pedestrian barriers**.

ZND has 50 plus years of history in manufacturing, with plants in Holland, France, Poland and the UK. Our origins stem from wire drawing and mesh manufacturing, but in the last 25 years we have built a solid reputation across Europe as the market leader in the manufacturing and supply of high quality temporary fencing, hoarding and pedestrian barriers.

Our UK operation was opened in 1997, and has developed into a high tech manufacturing facility, where innovation is at the core of our business. With substantial investment we developed and then automated the production of the now well known SmartWeld temporary fencing system which has become the markets preferred choice product.

We create the strongest, safest and smartest products on the market by continuously investing in new and improved manufacturing techniques, better and more rigorous testing and a firm commitment to research design and development.

Our commitment to UK manufacturing enables us to maintain high quality and fast delivery when you need it most.

Customer Portal

Photo and Illustration library for your promotions

Assembly guides

Technical drawings

Calculate your required stabilisation

Our customers get access to our **free online Customer Portal** giving you all the after sales support that you need.

Our Customer Portal offers you

Windspeed Calculator

Use our handy windspeed calculation tool to work out what stabilisation is needed for all our fence and hoarding panels. You can even find out real time windspeed information, request bespoke calculations and download PDF files.

Photo and Illustration library

Download high resolution photos and illustrations of all our products to use in your own promotions.

Assembly guides

Find out how to assemble and install our fences and hoarding in the safest way. Download our easy to understand assembly guides with your own branding.

Technical drawings

Download technical drawings of all our products with dimensions, pitch and wire diameters. You can even place your own branding on the drawings for your own use.

For access to the Customer Portal* go to **www.znduk.com/customerportal** and login or set up an account.

*Setting up an account will require ZND approval.

All our documents can be downloaded pre-branded with your **company's logo** and are ready to use!

SmartWeld

Temporary Fencing

ST25
ST30
ST38
RT38

Modular mesh temporary fencing has proved to be extremely popular with our customers in the construction and event management industries for site demarcation and to direct the public away from construction hazards or towards secure areas.

Since 1997 we have specialised in the manufacturing and continual development of SmartWeld™ temporary fencing, creating a comprehensive range of panels, designed and manufactured to a high standard.

All our temporary fencing panels are manufactured in our highly efficient, state of the art manufacturing facility in the UK, where we are able to produce more than 8000 fences a day in over 30 different specifications.

We offer a wide variety of specification options with a choice of:

• Frame styles
• Mesh types
• Wire diameters
• Corporate identity labels
• Surface finishes

We offer a comprehensive range of panels, manufactured to the highest possible standards, made to order and delivered directly to your site so you can be confident that we can meet all site situations and local health and safety requirements.

We have an extensive range of accessories to complement our panel systems including:

• Thermo-plastic and concrete bases
• Standard and lockable fence couplers
• Pedestrian and vehicle gates
• Height extension panels
• Stabilising systems

All our temporary fences can be powder coated in a colour of your choice

Many of ZND's products are protected by patents which can be found at www.znduk.com/patents

Fence Panel Ranges

Our fence panels are split into two different series: the Square Top **(ST)** and the Round Top **(RT)**.

Examples		
Product Range	Mesh Type	Options
ST30	Standard	CP
RT38	Anticlimb	3V
ST30	Euro	220

1 Frame Styles

ST

RT

ST25:
Horizontal Tube Diameter: 25mm
Vertical Tube Diameter: 38mm

ST30:
Horizontal Tube Diameter: 30mm
Vertical Tube Diameter: 40mm

ST38:
Horizontal Tube Diameter: 38mm
Vertical Tube Diameter: 38mm

RT38:
Horizontal Tube Diameter: 38mm
Vertical Tube Diameter: 38mm

2 Mesh Types

Standard

Vertical Pitch: 100mm
Vertical Wire Diameter: ø2.2
Horizontal Pitch: 262mm
Horizontal Wire Diameter: ø3.2

Euro

Vertical Pitch: 100mm
Vertical Wire Diameter: ø3.2
Horizontal Pitch: 262mm
Horizontal Wire Diameter: ø3.2

Anticlimb

Vertical Pitch: 43mm
Vertical Wire Diameter: ø2.2
Horizontal Pitch: 262mm
Horizontal Wire Diameter: ø3.2

3 Options

285cm

Special Length
Some panels are available in differing lengths. We can also create bespoke special lengths for your requirements.

CP
Adding corner plates increases the strength of the panel joint where they are used.

3V   **3H**
These options can add either a vertical or horizontal tube into the centre of the panel.

Now you are ready to order your fence panel, pick a frame type, select which mesh you want and choose from the optional extras to improve the panel quality.

ST25

Our ST25 range has horizontal tube diameters of 25mm and vertical tube diameters of 38mm
and is available in Standard and Anticlimb mesh with the option of corner plates.

Temporary Hoarding

We offer a range of both temporary and semi-permanent hoarding options.

Made from steel to ensure strength and durability all of our hoarding products combine quality with a cost-effective solution.

All our hoarding panels can be assembled and dismantled rapidly without the need for specialist tools or skills. Each panel has a galvanised finish as standard and can be customised by colouring with a polyester powder coated finish or adding stripes and decals that can be printed in our in-house print shop.

For your safety and peace of mind, we have a selection of stabilising options to withstand the worst weather conditions and an extensive range of accessories to complement our hoarding system, including:

- Vehicle and pedestrian gates
- Half mesh view panels
- Height extension panels
- Privacy infill panels

Contact us for more information about our bespoke hoarding panels to order.

All our temporary hoarding can be powder coated in a colour of your choice

Many of ZND's products are protected by patents which can be found at www.znduk.com/patents

Temporary Hoarding: Panels

All our Temporary Hoarding panels offer both strength and durability to meet the rigours of construction site use and are complemented with a range of accessories.

Pedestrian Barriers

Fixed Leg Barrier
Bar Barrier
Mesh Barrier

Our pedestrian barriers are available in a range of different options, all designed to provide an effective demarcation solution. With robust tubular steel frames, designed safety features combined with our rigorous testing for our barriers to give you the quality and reliability you need.

With a choice of vertical infill tubes or welded mesh, inbuilt or detachable feet, and a high quality galvanised appearance that can be coloured to match your corporate image, we have plenty of options to ensure you're getting the right barrier for the job.

Our most popular barriers are the SmartWeld™ Pedestrian Barrier range which feature:

Fixed legs with swaged feet for safety, which are welded to the frame in an offset position making them ideal for stacking.

The fixed legs are further re-enforced with a **patented** support brace which triangulates the front and rear footing adding strength and protection.

Our barriers have a strong tubular frame with vertical infill tubes and follow the very latest European standards.

Mig Braze welding is used for extra strength and durability and a better long term appearance.

The Euro Mesh Pedestrian Barrier is our most economical form of low-level demarcation. The lightweight barrier is 3.5 metres in length and has a welded mesh infill making it a popular choice for construction site use.

All our barriers can be enhanced with a range of accessories such as corporate labels and advertising covers.

All our pedestrian barriers can be powder coated in a colour of your choice

Many of ZND's products are protected by patents which can be found at www.znduk.com/patents

SmartWeld Fixed Leg Barrier

The Fixed Leg Barrier is our most popular barrier product due to its unique construction that incorporates an integral connection system and fixed legs.

SmartWeld barriers are constructed using the latest braze welding technology that offers improved strength and resistance to corrosion.

Illustration shows Smartweld 2.3 Fixed Leg Barrier

Frame	Dimension (mm)	Frame Ø (mm)	Infill	Weight (kg)	Finish	Stock Code
SmartWeld 2.3 Fixed Leg Barrier	2262 x 1100	38.1	12mm Tube 112mm Aperture	10.6	Pre-Galvanised	01063010
SmartWeld 2.5 Fixed Leg Barrier	2510 x 1100	38.1	12mm Tube 112mm Aperture	11.5	Pre-Galvanised	01065010

Please note, all dimensions and weights are correct at the time of print, however they are subject to change. Please refer to the customer portal for the latest information.

SmartWeld Bar Barrier

The main feature of the Bar Barrier is that it can be used with a variety of feet including flat feet which reduce tripping hazards.

SmartWeld barriers are constructed using the latest braze welding technology that offers improved strength and resistance to corrosion.

Illustration shows Smartweld 2.5 Bar Barrier

Frame	Dimension (mm)	Frame Ø (mm)	Infill	Weight (kg)	Finish	Stock Code

Event Barrier Systems

We provide temporary fencing, hoarding and barriers for some of the biggest events in the calendar.

We're trusted by some amazing organisations, who rely on us at short notice to manufacture and deliver large volumes direct to prestigious events such as the London 2012 Olympic Games and the 2014 Glasgow Commonwealth Games and Glastonbury to name a few.

Our specialist event products include cycle barriers and police barrier systems.
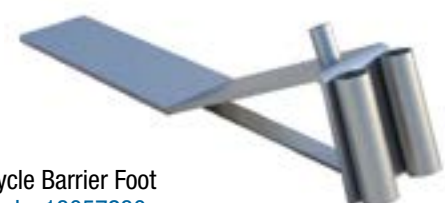

All our event systems are available fully manufactured, branded and delivered directly to your site.

All our event barrier systems can be powder coated in a colour of your choice

Many of ZND's products are protected by patents which can be found at www.znduk.com/patents

Stabiliser Systems

Thanks to our wide array of stabilising products, assembling a run of fencing, hoarding and ensuring they stay up, whatever the weather, is now easy and straightforward.

Designed and developed for use in a range of environmental conditions, sites, surfaces and locations, our stabilisers help you maintain the highest standards of health and safety.

To help ensure you get the correct stabilising system for your run of fences, hoarding or barriers we maintain a Customer Portal where our valued customers can access our assembly guides as well as our unique Wind Resistance Calculator which provides performance information on each and every stabilising option and panel, backed up by detailed structural calculations.

We are also available to provide advice and guidance for your particular site requirement.

ZND Print Services

All in one solution:
Manufactured, branded and delivered.

To ensure our customers get the best possible experience we now offer a convenient in-house printing solution providing fencing, hoarding and barrier products that are manufactured, branded, delivered and ready to use.

We can manage all post-manufacture print installation, from basic labelling to full banner coverings and using the latest techniques in UV printing technology we can provide printed products that are:

- Scratch resistant
- Waterproof
- Colour consistent
- Fade resistant

We can also provide a wide range of printable media on which to place your print including:

- Diabond
- PVC foam board
- PVC banner material
- PVC mesh
- Paper
- Vinyl
- Bubble board
- Sheet aluminum

To find out more about our UK based print room and how it could help your business, please visit **www.znduk.com/print** and watch our video.

We're proud to be associated with some of the most high profile events around the world, including the London 2012 Olympic Games. Our enormous in-house capacity to manufacture panels means most of our products can be made to meet very short timescales.

We are committed to finding ways of improving our existing products and services and strive to offer products that provide better performance, strength and safety, whilst controlling costs to offer our customers the best possible value.

Fresh thinking helps us to create new products and bring more choice into the markets we serve.

Please do not hesitate to get in touch with us if you have any questions about our service or products.
